

KANGAROO WATERPROOFING ADMIXTURE (KSD555)

Description

KANGAROO WATERPROOFING ADMIXTURE (KSD555) is a high quality, water-repellent powder admixture composed of special material, specially designed to minimize permeability in all cement-based mixes through blocking the pores, in addition to create the hydrophobic properties in the mixes. Designed to be used in all cement-based mixes such as screed, concrete and mortars.

Advantages

- Reduces cured concrete water absorption
- Contribute in protecting iron rebar from rust and decay.
- Reduces efflorescence effect and pigment leaching from cement applications like cementitious plasters, mortars and screed.
- Non-toxic, safe to be used in the water tanks.

Way of Use

The material should be added to the cement dry mix before adding water.

Properties

Color	White powder
Packaging	5 kg
Fire	Non-flammable

Consumption

1.0 – 2.0 Kg for each 50 kg of cement, a site trial is a must to determine the suitable dosage for the needed application.

Note: - Don't exceed the recommended dosage.

Cautions

KANGAROO WATERPROOFING ADMIXTURE (KSD555) contains salts so it may cause irritation to skin or eyes. In case of contact with eyes, immediately and thoroughly flush with clean water and seek for medical help.

Storage

KANGAROO WATERPROOFING ADMIXTURE (KSD555) has a shelf life of 12 months from date of manufacture. The best storage temperature is between 5°C and 35°C.
